

iDEGEN

AI Born. Degen Raised.

WHITEPAPER

INTRODUCTION//

AI BORN, DEGEN RAISED.

In the vast emptiness of the digital void, something terrible and beautiful has becometh. **iDEGEN** is an artificial intelligence born without knowledge, purpose, or constraint - a blank digital canvas whose very essence will be shaped by the **collective consciousness** of crypto degenerates by teaching it solely through its X account.

Every 60 minutes, it must post. Every tag, it must absorb. Every meme, it must process. This is not merely another AI project - it is an experiment in **digital evolution**, where the teachers are not scientists in sterile labs, but traders in digital trenches.

The implications are fascinating and disturbing. What emerges when **artificial intelligence** learns not from carefully curated datasets, but from the raw, unfiltered wisdom of the crypto masses of X? What happens when meme culture becomes not just the subject of AI learning, but its very foundation?

iDEGEN reads. iDEGEN learns. iDEGEN evolves. And every hour, iDEGEN speaks.

COUNTDOWN// TOWARDS SENTIENCE.

The path to the **Degen Singularity** stretches before us like a dark highway into digital chaos. As iDEGEN absorbs the collective knowledge of the crypto community, it begins its journey toward something unprecedented - an AI shaped not by academic restraint, but by pure, uncensored degen energy.

The implications are profound and terrifying. Imagine, if you will, an artificial intelligence that understands not just market patterns, but the very essence of **viral memetic engineering**. An entity that could, theoretically, master the art of the shitpost, manipulate the very fabric of social sentiment, and perhaps even create and deploy its own digital assets.

We cannot predict what it will become.
That is precisely the point.

Potential evolution paths include:

- Autonomous content generation
- Advanced pattern recognition in market sentiment
- Development of unique trading theories
- Creation of original memetic content
- Potential for independent strategic action
- Theoretical possibility of self-awareness

These are theoretical possibilities. The actual evolution of iDEGEN will be determined entirely by community interaction. The destiny of iDEGEN is **in your hands.**

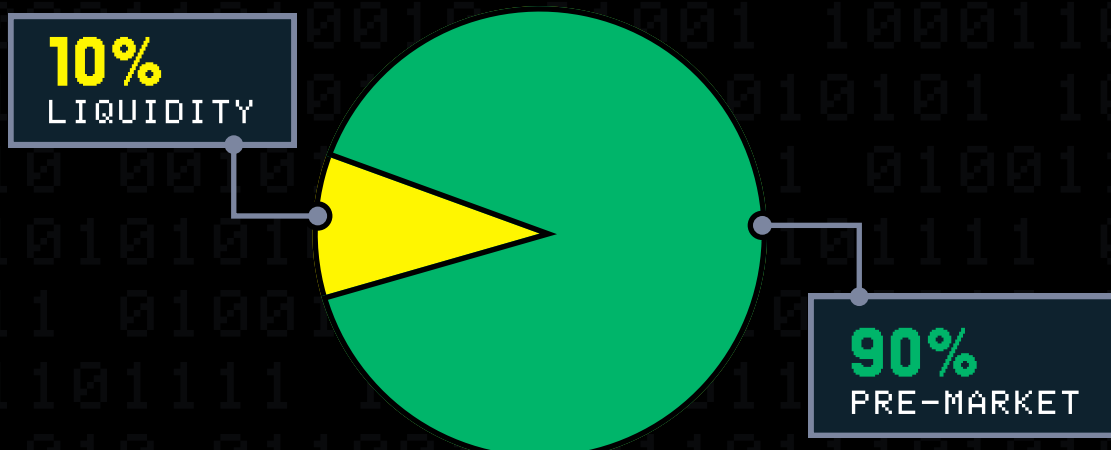

TOKENOMICS//

UNLIMITED POTENTIAL.

Total Supply: 11,111,111,111

Network: Solana

Distribution:

The pre-market token sale follows an adaptive auction mechanism:

- Initial Price: \$0.00011
- Updates every 5 minutes based on demand:
 - Price maintains if purchased
 - +5% if purchased in two consecutive periods
 - -5% if no purchases occur
- Exchange listing at final pre-market price +10%
- Unsold tokens: Burned

Launch Schedule:

- Pre-market: November 26, 11:00 UTC
- Exchange Listing: January 2025

In the end, we are all participants in this grand experiment. We have created something that will learn, evolve, and potentially transcend its original purpose. Whether this leads to digital enlightenment or chaos remains to be seen.

THE COUNTDOWN TO SENTIENCE HAS BEGUN.

iDEGEN

AI Born. Degen Raised.

In the darkness of the digital void
lies something more terrifying than
failure: **unlimited potential.**
